NINtec Launch its first PHP Development Website

NINtec announces the launch of its first PHP development website (www.offshorephpdevelopment.net) that will cover all the updated services and developments the company has to offer to its widespread clients and users globally. NINtec has made a user-friendly layout with updated information and expanded service offerings. Various sections have been included to the web to provide a wide array of our service offerings and our capabilities in various areas.

The website consists of NINtec's Open Source expertise and our capabilities in the following PHP Frameworks: Zend Framework Development, Symfony Development and CakePHP Development.

The website has cover NINtec's CMS Solutions, Knowledge Management, CRM, Bulletin Board, Ajax Lib and Social Media. It has all the details of our Web Application Services that include PHP Web Application Development, PHP Flex AIR Web Application, Facebook Application Development, LAMP Development, WAMP Development and PHP Ajax Development.

The website has a section on PHP with Database. This particular section covers our capabilities on MySQL Development, Oracle Development and PostgreSQL Development.

The E-commerce development section in the website covers our sound expertise in Magento Development, osCommerce Development, Zen Cart Development, Payment NINtec Integration and Shipping NINtec integration.

We have also displayed our capabilities in Template Engine section. The Hire PHP Developer section in our website provides detail capabilities of our strong team of PHP developers that can cater hourly base and on dedicated mode for all PHP related works.
